

Proposed DA - Att. A - Development Agreement Content & Criteria

Attachment A

Development Agreement - Contents and Criteria

SMC 20.30.355(B) Development Agreement Contents

A. Purpose. To define the development of property in order to implement framework goals to achieve the City's adopted vision as stated in the Comprehensive Plan. A development agreement is permitted in all zones and may modify development standards contained in Chapter 20.50 SMC. A development agreement in the MUR-70' zone may be approved to allow increased development potential above the zoning requirements in Chapter 20.50 SMC.

B. Development Agreement Contents (General). A development agreement shall set forth the development standards and other provisions that shall apply to govern and vest the development, use, and mitigation of the development of the real property for the duration specified in the agreement (RCW 36.70B.170). Each development agreement approved by the City Council shall contain the development standards applicable to the subject real property. For the purposes of this section, "development standards" includes, but is not limited to:

1. Project elements such as permitted uses, residential densities, and nonresidential densities and intensities or building sizes;
2. The amount and payment of impact fees imposed or agreed to in accordance with any applicable provisions of State law, any reimbursement provisions, other financial contributions by the property owner, inspection fees, or dedications;
3. Mitigation measures, development conditions, and other requirements under Chapter 43.21C RCW;
4. Design standards such as maximum heights, setbacks, drainage and water quality requirements, landscaping, and other development features;
5. Affordable housing units;
6. Parks and open space preservation;
7. Phasing of development;
8. Review procedures and standards for implementing decisions;
9. A build-out or vesting period for applicable standards;
10. Any other appropriate development requirement or procedure;
11. Preservation of significant trees; and
12. Connecting, establishing, and improving nonmotorized access.

Proposed DA - Att. A - Development Agreement Content & Criteria

C. **Decision Criteria.** A development agreement (general development agreement and development agreements in order to increase height above 70 feet) may be granted by the City only if the applicant demonstrates that:

1. The project is consistent with goals and policies of the Comprehensive Plan. If the project is located within a subarea plan, then the project shall be consistent with the goals and policies of the subarea plan.
2. The proposed development uses innovative, aesthetic, energy-efficient and environmentally sustainable architecture and site design.
3. There is either sufficient capacity and infrastructure (e.g., roads, sidewalks, bike lanes) that meet the City's adopted level of service standards (as confirmed by the performance of a transportation impact analysis) in the transportation system (motorized and nonmotorized) to safely support the development proposed in all future phases or there will be adequate capacity and infrastructure by the time each phase of development is completed. If capacity or infrastructure must be increased to support the proposed development agreement, then the applicant must identify a plan for funding their proportionate share of the improvements.
4. There is either sufficient capacity within public services such as water, sewer and stormwater to adequately serve the development proposal in all future phases, or there will be adequate capacity available by the time each phase of development is completed. If capacity must be increased to support the proposed development agreement, then the applicant must identify a plan for funding their proportionate share of the improvements.
5. The development agreement proposal contains architectural design (including but not limited to building setbacks, insets, facade breaks, roofline variations) and site design standards, landscaping, provisions for open space and/or recreation areas, retention of significant trees, parking/traffic management and multimodal transportation improvements and other features that minimize conflicts and create transitions between the proposal site and property zoned R-4, R-6, R-8 or MUR-35'.
6. The project is consistent with the standards of the critical areas regulations, Chapter [20.80](#) SMC, Critical Areas, or Shoreline Master Program, SMC Title [20](#), Division II, and applicable permits/approvals are obtained.
