FINDINGS AND DETERMINATION OF THE CITY OF SHORELINE PLANNING COMMISSION
Scott Becker Rezone Request File #201522

Summary-
Following the public hearing and deliberation on the request to change the zoning designation for a 15,200 Sq. Ft. parcel located at 18016 Stone Ave N, the City of Shoreline Planning Commission has determined that the request is in compliance with City codes and not detrimental to the health, safety, or welfare of the City of Shoreline, and therefore recommends approval of such action.

I. FINDINGS OF FACT

1. Project Description-
   1.1 Rezone the subject parcel from R-8 (Residential 8 units per acre) to R-12 (Residential 12 units per acre).
   1.2 Site Address: 18016 Stone Ave N
   1.3 Parcel Number: 727610-0285
   1.4 Zoning: R-8
   1.5 The subject property has a current land use designation of Medium Density Residential identified on the City of Shoreline's Comprehensive Plan Land Use Map. The status of Medium Density Residential allows for a change in zoning up to R-12 zoning.

4 SEPA Determination-

4.1 The optional DNS process for local project review, as specified in WAC 197-11-355, was used. A Notice of Application that stated the lead agency’s intent to issue a DNS for this project was issued on May 4th, 2006 and a 14-day comment period followed ending May 18th, 2006. City staff determined that the proposal will not have a probable significant adverse impact on the environment and that an environmental impact statement is not required under RCW 43.21C.030 (2) (c). This decision was made after visits to the project site and review of the environmental checklist, and other information on file with the City. A notice of determination of nonsignificance was issued on May 18th, 2006.

7. Consistency –

5.1 Site Rezone:

The application has been evaluated and found to be consistent with the five criteria listed in Shoreline Municipal Code Section 20.30.320 (B).

5.2 A recommendation to approve the Rezone does not constitute approval for any development proposal. Applicable permits shall be obtained prior to construction. Permit applications shall show compliance with the 1998 King County Storm Water Design Manual and Title 20 of the Shoreline Municipal Code (SMC). Applicable sections of the SMC include but are not limited to the following: Dimensional and Density Standards 20.50.010, Tree Conservation 20.50.290, Surface and Stormwater Management 20.60.060, and Streets and Access 20.60.140 and any conditions of the Rezone.

II. CONCLUSIONS

SITE REZONE:

Rezones are subject to criteria contained in the Development Code. The proposal must meet the decision criteria listed in Section 20.30.320(B) of the SMC. The criteria are listed below, with a brief discussion of how the request meets the criteria.

1. The rezone is consistent with the Comprehensive Plan.

The Comprehensive Plan land use map identifies the subject properties as Medium Density Residential. The site is currently underutilized—the parcel is developed with
one single family home (developed at a density of 2.8 dwelling units per acre)—this is not consistent with the density goals and policies of the Comprehensive Plan which plans for this site to accommodate 8 to 12 dwelling units per acre to support housing targets within the City. The proposed zone change will allow the parcels to be developed to the level anticipated in the Comprehensive Plan.

R-12 zoning is an appropriate designation for the site. Placing R-12 zoning on the site allows the City to add development conditions that achieve many goals and policies of the Comprehensive Plan including incorporating low impact development techniques, small building footprints to reduce overall building coverage, protection of trees and natural vegetation on-site including retaining 65% of significant trees, environmentally friendly building materials and less impact to the natural features of the parcel than if developed under the current zoning designation.

The proposed development also promotes design that minimizes stormwater runoff rate and volume by limiting the size of building footprints and total site coverage, maximizing the protection of permeable soils and natural vegetation, and encouraging use of permeable pavements and surfaces.

2. The rezone will not adversely affect the public health, safety or general welfare.
   Staff concludes the proposed rezone and redevelopment of this site will positively affect the public health, safety and welfare of the surrounding neighborhood and community. The new construction will strive to protect the nature features and vegetation of the site. Unlike other recently added subdivisions in the immediate area, the applicant is proposing to place the new dwelling units around the natural features of the lot without disturbing most of the mature trees and vegetation. The latest in low impact development techniques are proposed for stormwater management, 65% of the significant trees on-site will be retained and required sidewalks will meander around very mature trees along Stone Avenue N. and not result in their removal.

3. The rezone is warranted in order to achieve consistency with the Comprehensive Plan.
The subject parcel is currently zoned R-8. Right now, the site is developed with one single-family house at a density of 2.8 dwelling units an acre which is underdeveloped under the current zoning category.
The Comprehensive Plan states that the Medium Density Residential Land Use designation is intended for areas where single family detached dwelling units might be redeveloped at slightly higher densities; and to areas currently zoned for medium density residential.

The applicant is proposing four low-impact single-family detached dwelling units which are fully supported by the goals and policies of the Comprehensive Plan. R-12 zoning would be an appropriate designation for the subject site, as it would reflect similar net densities as those uses near it.

4. **The rezone will not be materially detrimental to uses or property in the immediate vicinity of the subject rezone.**
   At this time there appears to be minimal negative impacts to the properties in the immediate vicinity of the subject rezone.

   The applicant is proposing low impact development techniques in addition to on-site retention. Examples of the features that could be used are rain gardens, small building footprints, restrictive use of impervious surfaces and other low impact measures.

   The applicant is proposing to retain at least 65% of the significant trees on-site, 45% more trees than the code requires. The applicant is proposing to exceed all code requirements in terms of tree retention and protection by proposing to keep as many of the significant trees as possible and place structures in and around the natural features of the parcel. The trees left in place will continue acting as a natural screen between properties to the north, east, west and south.

5. **The rezone has merit and value for the community.**
   By approving this specific redevelopment proposal, the aesthetics of the structures and site planning will be much more environmental friendly than if the site developed without the proposed rezone. Under the current zoning of R-8, the property owner could develop three single-family homes, cover much more of the site with impervious surfaces, and cut down most of the trees on-site without taking into account the neighbors' concerns. Staff believes by granting this rezone and conditions as presented to the Planning Commission, the City and the surrounding community will get a much better product that tries to fit into the natural aspects of the site rather than destroying it.
III. RECOMMENDATION

Based on the Findings, the Planning Commission recommends approval of application #201522; a rezone from R-8 to R-12, with the addition of the following conditions:

Condition #1- The scale and architecture of homes must exhibit characteristics of those presented at the Planning Commission such as small building footprints, lower building heights and homes that don't directly access Stone Ave N and are inwardly oriented.
Condition #2- Low impact development techniques must be used.
Condition #3- Building heights shall not exceed 25 feet.
Condition #4- At least 60% of significant trees shall be retained.
Condition #5- Trees acting as a natural screen on the north, west, east and south shall not be substantially modified from their current state.
Condition #6- Prior to development, an Arborist is retained by the developer to evaluate the northeast portion of the property and remove any hazardous trees present. Also, an Arborist shall visit the site to review tree removal during the course of development.
